About

Full-Stack MERN Developer with experience building production-ready web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST APIs, TypeScript, WebSockets, **AI integration**, and **cloud deployment** using Render and Vercel.

Education

Maharaja Agrasen Institute of Technology

Bachelor of Technology in Computer Science – CGPA: 8.03/10

2025 - 2028

New Delhi, India

Delhi Skill and Entrepreneurship University

Diploma in Computer Engineering - CGPA: 8.23/10.0

2022 - 2025

New Delhi, India

Technical Skills

Languages: JavaScript, Java, C, HTML5, CSS3, SQL, TypeScript

Frontend Technologies: React.js, Bootstrap, Tailwind CSS, Material UI, EJS, Styled Components

Backend Technologies: Node.js, Express.js, Socket.io, RESTful APIs, WebSockets

Databases & Tools: MongoDB, Git, Visual Studio Code, Postman, npm

Experience

Frontend Developer Intern

July 2024 – September 2024

Internpluss

Remote, New Delhi

- ❖ Engineered and deployed the company's message module using React.js, improving user engagement and internal communication efficiency
- ❖ Conducted comprehensive quality assurance testing across web applications, identifying and documenting 15+ critical bugs to enhance software reliability
- ❖ Automated web data extraction and structuring process using ChatGPT, reducing manual data collection time by 60%
- ❖ Collaborated with cross-functional teams to implement responsive UI components following modern design principles

Projects

NEXFOLIO - AI-Powered Resume Generator | *React.js, Node.js, Express.js, MongoDB, Gemini API* | [Github](#) | [Live](#)

- ❖ Developed full-stack AI resume platform enabling users to generate optimized, ATS-friendly resumes instantly
- ❖ Integrated **Google Gemini API** to create personalized resume content dynamically based on user input, increasing content quality and relevance
- ❖ Implemented secure email verification system using **Brevo API** to authenticate users and protect data integrity
- ❖ Added **API rate-limiting** & validation using **Zod**

EYSONIC AI – Smart Vision Assistive System | *Python, Flask, YOLOv8, OpenCV, dlib, JavaScript* | [GitHub](#)

- ❖ Developed an AI-powered assistive system for visually impaired individuals featuring **real-time object detection, face recognition, fire detection, distance estimation, and multilingual voice alerts**.
- ❖ Built a **Flask-based computer vision pipeline** integrating **YOLOv8, OpenCV**, and **dlib** for live webcam analysis with no cloud dependency.
- ❖ Implemented **English and Hindi voice guidance**, contextual detection modes, and real-time hazard alerts using the **Web Speech API**.
- ❖ Secured **1st Runner-up** at the **CodeSphere 36-Hour Hackathon** held at **SGT University, Gurugram**.

SNAP-TEXT - Real-Time Chat Application | *React.js, Node.js, Express.js, Socket.io, MongoDB* | [Github](#)

- ❖ Built real-time messaging platform with WebSocket technology (**Socket.io**) supporting instant bi-directional communication.
- ❖ Designed and implemented persistent chat history storage with MongoDB, enabling seamless message retrieval
- ❖ Developed RESTful API architecture with Node.js and Express.js to handle user authentication and message routing
- ❖ Created responsive and intuitive interface using Bootstrap and EJS templating, ensuring cross-device compatibility

Achievements

1st Runner-up – CodeSphere 36-hour Hackathon , SGT University , Gurugram | [Github](#) | [Proof](#)

- **EYESONIC-AI** : **AI-powered** assistive device that detects objects, recognizes faces, identifies fire, and speaks alerts in real time — designed to help **visually impaired** individuals **navigate safely**.

AIR 23 in the IPU LEET (Lateral Entry) Examination.
